EDUCATION

University of Massachusetts Boston Expected Spring 2027
Bachelor of Science, Computer Science Boston, MA
GPA: 3.6/4.0

PROJECTS

Sync | Founder & Team Lead 10/2026 – Present
AI-Powered iOS Menstrual Cycle Companion

- Founded Sync and led a seven-member team to build an iOS menstrual wellness app using SwiftUI and Firebase, featuring history-adaptive cycle predictions, symptom tracking, and phase-specific nutrition and movement suggestions.
- Led development of a Gemini-powered AI companion through Firebase AI Logic to answer questions using users' logged cycle and symptom data, with guardrails against unsupported medical advice and fabricated history.
- Won the People's Choice Award at the UMass Boston AI Symposium, earning 282 votes.

Sip & Swoon | Sole Developer & Founder 01/2026 – Present
Full-Stack Café Discovery and Review Application

- Developed a full-stack café discovery and review application with React, Express, PostgreSQL, and Supabase Auth.
- Integrated Google Places API to provide location-based café results while protecting API credentials and reducing repeated requests through caching.
- Designed an 8-table relational PostgreSQL database and connected it to 20 API endpoints supporting café and drink data, reviews, and user preferences.

Green Thumb | Team Lead & Developer 04/2026 – 05/2026
Sustainable E-commerce Web Application

- Led an agile team of 6 engineers and designers to develop a responsive e-commerce platform for plants and sustainable products based on client requirements.
- Designed interactive UI elements using HTML/CSS and JavaScript, including responsive buttons and hover effects for a randomized plant discovery feature.

WORK EXPERIENCE

Undergraduate Researcher – Wind Energy Systems Lab 01/2025 – 05/2025

- Collected and analyzed water-depth and turbine-location data across 14+ offshore wind farms using Python, NumPy, SciPy, and Matplotlib.
- Developed water-depth maps and visualizations to compare turbine locations, ocean depth, and offshore site conditions.
- Modeled offshore wind-farm layouts using PyWake and TopFarm to evaluate wake effects and estimate annual energy production (AEP).

TECHNICAL SKILLS

Languages	Java, JavaScript, C, C++, Python, SQL, Swift
Development Tools	Visual Studio, Git/GitHub
Web Development	React, Node.js/Express.js, HTML/CSS
Mobile Development	iOS, SwiftUI
Platforms	UNIX/Linux, macOS
Databases & Backend	PostgreSQL, Firebase/Firestore, Supabase Auth
