Education

University of Massachusetts, Boston, MA — Expected Spring 2027
Bachelor of Science: Computer Science
GPA: 3.6/4

Projects (Refer to GitHub for more)

Sip & Swoon | Cafe Discovery and Review Application for Coffee Lovers — January 2026 - Present

- Developed a full-stack café discovery and review application with React, Express, PostgreSQL, and Supabase Auth.
- Integrated Google Places API to provide location-based café results while protecting API credentials and reducing repeated requests through caching.
- Designed an 8-table relational PostgreSQL tables database and connected it to 20 API endpoints supporting café and drink data, reviews, and user preferences.

Green Thumb | Sustainable E-commerce Web Application — April 2026 - May 2026

- Led an agile team of 6 engineers and designers to develop a responsive e-commerce platform for plants and sustainable products based on client requirements.
- Designed interactive UI elements using HTML/CSS and JavaScript, including responsive buttons and hover effects for a randomized plant discovery feature.

Technical Skills

Languages: Java/JavaScript, C/C++, Python, SQL
Development Tools: Visual Studio, Git/GitHub
Web Development: React, Node.js/Express.js, HTML/CSS
Platforms: UNIX/Linux, macOS
Other: Object-oriented programming, software development, APIs, data analytics

Work Experience

Wind Energy Systems Lab – Undergraduate Researcher — January 2025 – May 2025

- Collected and analyzed water-depth and turbine-location data across 14+ offshore wind farms, using Python, NumPy, SciPy, and Matplotlib.
- Developed water-depth maps and visualizations to compare turbine locations, ocean depth, and offshore site conditions.
- Modeled offshore wind-farm layouts using PyWake and TopFarm to evaluate wake effects and improve annual energy production (AEP).
